**Material supply:** From a wide range of contractors, ELEMECH will supply its customers with best quality, and economical materials such as generators and spares, pumps, valves, compressors and wear plates and much more.

**Repair solutions:** Sophisticated mechanical equipments are very difficult and some time impossible to repair but we in ELEMECH together with our partners will provide a good range of repair solutions to cater all problems of our customers.

## Our Services

### Case studies:

At ELEMECH, we are specialized to analyze our customer's special business scenarios to best provide them efficient, effective and economical electrical and mechanical solutions. Such analysis may include turbocharger modifications solutions, modification from DFO to HFO etc.

### Turnkey projects:

Some customers prefer to have the job done without their involvement in procurement, installation and operation of their electrical and mechanical needs.

We at ELEMECH also undertake turnkey projects for our customers such as insulation or ATS for your generators, delivering a complete and operational power plant with the partnership of our valued suppliers.
